CybAram

CYBER PUZZLES

Creative Gameplay & Question Reference Book

Learn digital safety by playing, exploring, and solving.

A practical reference for Google AI Studio and the CybAram development team. These examples turn safety lessons into visual scenes, clue hunts, drag-and-drop activities, and interactive stories—not exam questions.

Visual direction

Minimal, professionally art-directed caricatures; warm off-white backgrounds; forest green and navy UI; restrained yellow accents; short instructions; meaningful animations; and generous whitespace. The scene should carry the story while text guides the player.

Important: These are sample concepts, not a claim that the website already implements them. Validate advice and test interactions before publishing.

How to use this book

Attach this PDF to Google AI Studio as a content and gameplay reference alongside the visual reference screenshot. Ask it to implement the mechanics and scenario data—not reproduce the pages as static images.

Each puzzle includes a player instruction, scene idea, interaction, expected outcome, and concise learning point. The correct answer must not be shown before the player acts.

Design rules

• One main task per puzzle; keep instructions short and plain-language.

• Vary mechanics: tap-to-discover, drag-and-drop, matching, sequencing, setting changes, and visual comparison.

• Do not colour-code the correct answer before the player interacts.

• After the action, give concise feedback and one practical lesson.

• Use original consistent characters and scene-specific illustrations.

• Make drag actions tap-accessible; provide captions or text alternatives for audio/video.

• Use fictional data only; never ask for real OTPs, passwords, bank details, or personal information.

• Include legitimate and ambiguous scenarios; teach verification rather than assuming every message is a scam.

Suggested five-puzzle round

1. Visual clue hunt • 2. Drag-and-drop safety action • 3. Enable a security setting • 4. Match a risk to a protection • 5. Short character story. Randomise selection and order between rounds.

Puzzle 01 — The Unusual Delivery Link

Tap to discover **Level:** Beginner **Category:** Links & browsing

PLAYER INSTRUCTION

Find the detail Arun should check.

SCENE / ILLUSTRATION DIRECTION

Arun holds a phone showing a parcel message, a small fee request, and a link with unusual spelling. Make the message the visual focus.

INTERACTION

Tap the sender, destination link, fee request, and parcel reference to inspect them; then select the detail that deserves attention.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

The unusual destination and unexpected payment request deserve independent checking; neither alone proves fraud.

LEARNING TIP
Open the delivery company’s official app or website yourself instead of relying on an unexpected link.

Puzzle 02 — Lock Away the OTP

Drag and drop **Level:** Beginner **Category:** OTP & privacy

PLAYER INSTRUCTION

Keep Rohan’s one-time code private.

SCENE / ILLUSTRATION DIRECTION

A phone call appears beside a fictional OTP card. Two destinations are shown: a locked private vault and a caller requesting the code.

INTERACTION

Drag the fictional OTP card into the private vault, with tap-to-select as an accessible alternative.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Keep the code private; never share an OTP with an unsolicited caller.

LEARNING TIP
Never share OTPs with someone who contacts you unexpectedly, even if they claim to be from a bank.

Puzzle 03 — Build the Account Shield

Interactive settings **Level:** Beginner **Category:** Account security

PLAYER INSTRUCTION

Add another layer of protection.

SCENE / ILLUSTRATION DIRECTION

Priya’s simulated settings show Password, Two-factor authentication, and Recovery options. No option is pre-highlighted.

INTERACTION

The player opens the security setting and enables two-factor authentication in the fictional interface.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Enable two-factor authentication where available; explain that it adds a layer, not perfect protection.

> **LEARNING TIP**
> Two-factor authentication makes account access harder for someone who only knows your password.

Puzzle 04 — Job Offer or Fee Trap?

Find the clue **Level:** Beginner **Category:** Jobs & payments

PLAYER INSTRUCTION

Tap the part of this offer worth checking.

SCENE / ILLUSTRATION DIRECTION

A woman working from home sees a job offer promising unusually high pay and requesting an upfront registration fee.

INTERACTION

Tap the fee, then help the character inspect the employer independently.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

An upfront fee is a warning sign worth investigating; verify the employer rather than relying on one clue alone.

> **LEARNING TIP**
> Research the employer independently and be cautious about paying to obtain a job.

Puzzle 05 — Choose the App Permissions

Sort and review **Level:** Beginner **Category:** Privacy

PLAYER INSTRUCTION

Review what this app really needs.

SCENE / ILLUSTRATION DIRECTION

A flashlight app is shown beside permission tiles for Camera, Contacts, Location, and basic device functions.

INTERACTION

Move permissions that do not appear necessary into a Review tray; explain that context matters.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Review whether sensitive permissions are necessary for the app’s purpose.

> **LEARNING TIP**
> Give apps only the permissions they need and review them periodically.

Puzzle 06 — The Too-Good-To-Be-True Sale

Compare the scene **Level:** Beginner **Category:** Online shopping

PLAYER INSTRUCTION

What should Priya check before paying?

SCENE / ILLUSTRATION DIRECTION

An online offer advertises a very steep discount and asks for direct payment. Seller profile and return information are visible.

INTERACTION

Tap seller identity, payment method, or return details to inspect them, then choose a safe next step.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Check seller reputation, payment protections, and terms independently before deciding.

LEARNING TIP
A large discount is not proof of a scam, but it is a reason to check the seller carefully.

Puzzle 07 — Update the Safe Way

Choose a route **Level:** Beginner **Category:** Device safety

PLAYER INSTRUCTION

Help Mei update her phone safely.

SCENE / ILLUSTRATION DIRECTION

Mei sees a website pop-up urging her to download an update file; her phone’s official settings icon is also visible.

INTERACTION

Move the update task to the device’s official settings route instead of downloading an unexpected file.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Use the device’s built-in update settings or official app store.

LEARNING TIP
Install updates from trusted, official sources.

Puzzle 08 — Who Needs the Password?

Character decision **Level:** Beginner **Category:** Passwords

PLAYER INSTRUCTION

Help Kavin protect his account.

SCENE / ILLUSTRATION DIRECTION

Two characters discuss reusing one password everywhere versus using unique passwords and a password manager.

INTERACTION

Tap the illustrated password cards to see the risk of reuse, then choose a safer setup.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Use unique passwords and consider a reputable password manager.

LEARNING TIP
Reusing passwords can put multiple accounts at risk if one is compromised.

Puzzle 09 — The Official Travel Reminder

Verify wisely **Level:** Beginner **Category:** Legitimate alerts

PLAYER INSTRUCTION

Check the reminder before acting.

SCENE / ILLUSTRATION DIRECTION

Arun receives a fictional airline check-in reminder. It has no payment demand, but its appearance alone does not prove it is genuine.

INTERACTION

Choose to check the booking in the official airline app or trust the message immediately.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Check the booking independently through the airline's official app or website.

LEARNING TIP
Some alerts are legitimate. Verify important details through a trusted channel.

Puzzle 10 — Public Wi-Fi Choice

Scene choice **Level:** Beginner **Category:** Safe browsing

PLAYER INSTRUCTION

Choose a safer way to handle this task.

SCENE / ILLUSTRATION DIRECTION

A traveller is on public Wi-Fi and is about to access a sensitive account. Mobile data and a secure official app are shown.

INTERACTION

Tap a safer route for the sensitive task; do not imply all public Wi-Fi is automatically malicious.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Prefer a trusted connection for sensitive activity and heed browser security warnings.

LEARNING TIP
Be extra careful with sensitive accounts on networks you do not control.

Puzzle 11 — The Payment Detail Change

Put steps in order	**Level:** Intermediate	**Category:** Business payments

PLAYER INSTRUCTION

Help the shop owner verify changed bank details.

SCENE / ILLUSTRATION DIRECTION

A small-business owner receives an email asking for an invoice payment to go to new bank details.

INTERACTION

Arrange: pause payment, contact a known contact using an already trusted number, then confirm through the established process.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Verify the change through a trusted, independent channel before transferring money.

> **LEARNING TIP**
> Never rely only on contact details in the message requesting a payment change.

Puzzle 12 — Spot the Oversharing

Tap the risky detail	**Level:** Beginner	**Category:** Social media

PLAYER INSTRUCTION

What should Maya avoid posting publicly?

SCENE / ILLUSTRATION DIRECTION

A social post draft contains a holiday date, a visible boarding pass, and a landscape photo.

INTERACTION

Tap details that could expose sensitive travel or identity information, then edit the post.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Avoid publicly sharing boarding-pass details or information exposing sensitive travel plans.

> **LEARNING TIP**
> Review photos and posts for personal information before sharing them publicly.

Puzzle 13 — A Suspicious Login Alert

Response puzzle	**Level:** Intermediate	**Category:** Incident response

PLAYER INSTRUCTION

Help Dev respond to unfamiliar account activity.

SCENE / ILLUSTRATION DIRECTION

Dev sees an account alert for a login he does not recognise. An official app icon and an unknown link appear.

INTERACTION

Choose to open the account independently through its official app/site and follow security guidance.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Use an independently opened official channel to investigate and secure the account.

> **LEARNING TIP**
> Do not use an unexpected link to investigate a sensitive account alert.

Puzzle 14 — Back Up the Memories

Match the pairs	**Level:** Beginner	**Category:** Backups

PLAYER INSTRUCTION

Match each risk with a helpful protection.

SCENE / ILLUSTRATION DIRECTION

A family has photos and documents on one laptop. Cards show device failure, a backup copy, and recovery.

INTERACTION

Match device loss with maintaining a separate, protected backup.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Keep backups of important files and periodically check they can be restored.

> **LEARNING TIP**
> A backup can help recover important files after device loss or certain incidents.

Puzzle 15 — The QR Code Detour

Investigate the scene	**Level:** Intermediate	**Category:** QR safety

PLAYER INSTRUCTION

Inspect before opening this QR destination.

SCENE / ILLUSTRATION DIRECTION

A café table shows a QR sticker placed over a printed menu code; a phone preview shows a destination domain.

INTERACTION

Tap the code placement and destination preview, then choose to confirm with staff or open it immediately.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Inspect the destination and confirm suspicious or altered codes before proceeding.

> **LEARNING TIP**
> QR codes can hide destinations; treat them like links and check where they lead.

Puzzle 16 — A Friend Needs Urgent Money

Character story	**Level:** Beginner	**Category:** Impersonation

PLAYER INSTRUCTION

Help Anu check this urgent request.

SCENE / ILLUSTRATION DIRECTION

Anu receives a message from a familiar profile asking for money urgently and discouraging a phone call.

INTERACTION

Choose a separate, trusted way to contact the friend before sending money.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Confirm the request through an independent, trusted communication channel.

> **LEARNING TIP**
> A familiar name or profile picture does not prove who sent a message.

Puzzle 17 — The App Wants Your Location

Permission puzzle	**Level:** Beginner	**Category:** Privacy

PLAYER INSTRUCTION

Choose a location setting that fits the app.

SCENE / ILLUSTRATION DIRECTION

A simple calculator app requests continuous location access; simulated permission controls are visible.

INTERACTION

Set the permission to deny or limit access when it is not needed for the app’s function.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Avoid granting location access without a clear need; choose the least intrusive suitable permission.

> **LEARNING TIP**
> Review location access and choose settings appropriate to each app.

Puzzle 18 — The Fake Support Caller

Listen or read	**Level:** Intermediate	**Category:** Social engineering

PLAYER INSTRUCTION

What is the safest next move?

SCENE / ILLUSTRATION DIRECTION

A short optional audio clip or caption shows a caller claiming to be support and requesting remote access.

INTERACTION

Choose to end the interaction and contact official support independently, rather than installing a requested remote-access tool.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Do not grant unsolicited remote access; contact the organisation through an official channel if needed.

> **LEARNING TIP**
> Do not install remote-access tools just because an unsolicited caller asks.

Puzzle 19 — Secure the Recovery Options

Build a safer setup	**Level:** Intermediate	**Category:** Account recovery

PLAYER INSTRUCTION

Help Leela prepare to recover her account.

SCENE / ILLUSTRATION DIRECTION

A simulated account page shows recovery email, phone, and backup-code options; one recovery detail is outdated.

INTERACTION

Identify the outdated detail and update the fictional recovery setup.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Keep recovery information current and store backup codes securely where provided.

> **LEARNING TIP**
> Recovery options can help regain access; protect them and keep them up to date.

Puzzle 20 — You Clicked by Mistake

Arrange the response	**Level:** Intermediate	**Category:** Incident response

PLAYER INSTRUCTION

Help Sam take the next safe steps.

SCENE / ILLUSTRATION DIRECTION

Sam opened a suspicious link but has not entered details. A calm guide appears beside the phone.

INTERACTION

Arrange sensible steps: close the page, do not enter information or download files, and seek trusted help if anything was entered or downloaded.

EXPECTED OUTCOME — NOT SHOWN BEFORE THE PLAYER ACTS

Stop interacting; next steps depend on whether information was entered, a file downloaded, or an account/device may be affected.

> **LEARNING TIP**
> Stay calm and respond based on what happened. If credentials were entered, secure the account through official channels.

Implementation notes for Google AI Studio

Use this book as a content and interaction reference. Do not render the PDF pages as the game UI. Implement each activity as a real, responsive, interactive scene.

• Create structured scenario data and reusable components for each interaction type.

• Keep answer logic separate from presentation so the correct answer is not exposed by pre-highlighted colours or labels.

• Use five varied activities per round; avoid duplicates within a round and minimise recent repeats across replays.

• These 20 examples are starter references. Expand into a validated 200-scenario bank without duplicates or superficial name/number changes.

• Use original, consistent caricature assets and purposeful animations; do not rely on emoji or random AI posters.

• Use fictional names, domains, account screens, codes, and transactions.

• Validate time-sensitive or jurisdiction-specific advice before publishing.

• Test touch interaction, keyboard access where practical, reduced motion, audio controls, scoring, replay, and poster export.

Suggested instruction to attach with this reference

> “Use this CybAram Cyber Puzzles Reference Book to implement a polished, minimal, visual learning game. Follow the scene concepts, interaction types, and learning tips. Do not turn them into examination cards or static mock-ups. Implement real interactions, reveal feedback only after the player acts, and use consistent original illustrations. First implement three complete sample puzzles of different types, then expand the system across the scenario bank.”
